

LogiTrack — User Guide

Your logistics dashboard for tracking trips, expenses, and profitability.

Table of Contents

- 1. [Signing In](#)
- 2. [The Dashboard](#)
- 3. [Logging a Trip](#)
- 4. [Tracking Expenses](#)
- 5. [Filtering by Date](#)
- 6. [Charts & Analytics](#)
- 7. [Exporting to Excel](#)
- 8. [Editing & Deleting Records](#)
- 9. [Using on Mobile](#)

1. Signing In

Open the app link in your browser. Enter your email and password, then click **Sign In**. You'll land on the Dashboard.

Your login credentials are provided separately. If you can't log in, contact your administrator.

2. The Dashboard

The Dashboard is your financial overview. All numbers update automatically based on your selected date range.

What each number means

Card	What it shows
Income	Total payout from all trips in the selected period
Expenses	Total costs (fuel, repairs, salary, etc.) in the selected period

Card	What it shows
Net Profit	Income minus Expenses
Margin %	What percentage of income you keep after costs
Trips	Number of trips logged in the selected period
Avg Pay/ Trip	Average payout per trip
This Month	Current calendar month's income and net — always shows the current month regardless of your date filter

The **trip breakdown** below the cards tells you at a glance how many were standard Deliveries vs OTO (dedicated truck) trips, how many were long distance runs, and how many were entered online vs manually.

3. Logging a Trip

Go to the **Trips** tab and click **+ Add Trip**.

Field guide

Field	Required	What to enter
Date	Yes	Date the trip ran (defaults to today)
Trip Type	Yes	Delivery for standard loads · OTO for dedicated full-truck jobs
Status	Yes	Online if dispatched through the system · Manual if recorded on paper
Invoice #	Optional	The invoice or waybill number for this trip
Trip ID	Optional	The dispatch/system trip reference number
Distance (km)	Yes	Door-to-door kilometres
Weight (kg)	Yes	Load weight in kilograms
Grouped Invoices	Optional	Use when multiple invoices are on one load — enter them comma-separated
Grouped Trip IDs	Optional	Same as above for trip IDs

Field	Required	What to enter
Notes	Optional	Route, customer name, or any other remarks

Payout is automatic

You never need to calculate a payout yourself. As soon as you enter the distance and weight, the **Payout** field updates instantly. It applies your rate card and deducts the 15% VAT markdown — the number shown is what you actually receive.

Long-distance trips

Any trip over **150 km** is automatically treated as long distance and billed at a flat **R23 per km** (before markdown). These trips show an amber **LD** badge in the trip list so they stand out.

4. Tracking Expenses

Go to the **Expenses** tab and click **+ Add Expense**.

Expense categories

Category	Use it for
Fuel	Diesel or petrol fillups
Repairs	Mechanical work, tyres, servicing
Breakages	Damaged or lost cargo
Salary	Driver wages, helper pay
Other	Tolls, permits, anything else

Every expense you log is deducted from your net profit on the Dashboard and included in the Expense Breakdown chart.

5. Filtering by Date

The **date range selector** in the top-right corner controls every tab — the Dashboard KPIs, the Trips list, Expenses list, and all Charts all update together.

Use the quick-select buttons (**This Month**, **Last Month**, **Year to Date**) for common periods, or set custom **From** and **To** dates manually.

Saving a date range

If you regularly pull the same period (e.g. every quarter, every payroll cycle): 1. Set your **From** and **To** dates 2. Click **+ Save This Range** 3. Give it a name — it stays saved and is one click to reuse next time 4. To remove a saved range, click the **×** next to its name

6. Charts & Analytics

The **Charts** tab gives you five visual breakdowns of your business, all filtered by your selected date range.

Income vs Expenses vs Net

A monthly bar chart with a net profit line overlay. Use this to see at a glance whether your income is growing faster than your costs.

3-Month Projection

Shows where your income and expenses are heading based on your recent trend. Solid lines are your real data; dashed lines are the forecast for the next three months.

Expense Breakdown

A doughnut chart showing what proportion of your total spend goes to each category (Fuel, Repairs, Salary, etc.).

Delivery Tracking

A stacked monthly bar showing how many Delivery vs OTO trips you ran each month. Useful for spotting which service type is driving your volume.

Local vs Long Distance

Shows what share of your trips triggered the long-distance rate (over 150 km) vs the standard rate card.

7. Exporting to Excel

On the **Trips** or **Expenses** tab, click the **Export Excel** button.

The downloaded file contains: - A **Trips** sheet with every column and a total payout row at the bottom - An **Expenses** sheet with every column and a total amount row at the bottom - Currency formatted as `R #,##0.00`

The export includes all records, not just what's visible in your current date filter. You can filter or sort further in Excel as needed.

8. Editing & Deleting Records

Editing a trip or expense

Click the ➡ **Edit** button on any row. The row opens as an inline form directly in the table — change what you need, then click **Save**. Payout recalculates automatically if you change distance or weight.

Deleting a record

Click the 🗑 **Delete** button on the row. You'll be asked to confirm before it's removed.

9. Using on Mobile

LogiTrack works on phones and tablets. On smaller screens the layout adapts automatically:

- Navigation moves to a **bottom bar** — tap the icons at the bottom to switch tabs
- The trips and expenses tables become **stacked cards**, one card per record
- All buttons and inputs are sized for touch
